

What has to be true?

3-5 YEARS FROM NOW

- *Availability of bidirectional charging stations to push and pull power*
- *Large enough EV fleets online*
 - *24k EV's discharging at the same time*
- *Ample downtime for discharge*

WHAT'S THE FUTURE

- *We can think of EV Fleets as a mobile power plant*
- *Predict the economics of scaling an EV fleet*
- *Enable utility companies to smooth peak power (Duck Curve)*
